Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.3218 may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 2, 4-6, 8-10, 12-16, 18 and 19 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 09/753,989. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are claiming the same subject matter.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 3627

4. Claims 1, 2, 4-6, 8-10, 12-16, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toosky in view of Schumacher and further in view of Cosenza. Toosky discloses a nut having an insert and in the embodiment of Fig. 9, it is shown as a helically coiled wire. The insert is intended to prevent galling (column 5, lines 12-35). Schumacher discloses an alloy made up of the elements each defined to be within a specific range to resist galling. The disclosed range of each element overlapping that as claimed for the same element. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to make the insert of Toosky out of a material as disclosed in Schumacher because the alloy itself resisting galling would be preferable to a separate coating or plating as currently employed in Toosky. The separate plating would require addition manufacturing. Cosenza teaches the insert to having the same shape as that claimed by applicant thus is shown the diamond-shaped cross-section and apparently the 60E internal screw thread convolution. At the time the invention was it would have been obvious for one of ordinary skill in the art to make the insert of Toosky of a shape as disclosed in Cosenza because the shape of the insert of Cosenza provides for superior thread engagements. The examiner takes notice with respect to the removable tang. The improved yield strength being inherent in the combination.

Applicant's arguments have been considered where as discussed above, the improved yield strength would be inherent once the combination was made.

Art Unit: 3627

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is (703) 308-0182. The examiner can normally be reached on Monday-Friday.

Any inquiry of a general nature relating to the status of this application should be directed to the group receptionist at (703) 308-2168.
